## MODERN

### Introducing Staron's high-quality kitchen finishes especially for you.

The kitchen is the most important space in a home where the whole family comes together to share their happiness and bolster dreams. It is where you hold special memories of your past, present and future. Upgrade this special space with Staron solid surface.

# ELEGANCE

## Variety of smooth seamless surfaces and curves

Staron is an impeccably flawless synthetic acrylic marble. No matter what shape is envisioned for the product, the smooth surfaces create a seamless finished design. These subtle features differentiate materials of high quality design.

In addition, a variety of curves can be added for a sleek, unique design that meets your needs.

# SIMPLE

## Smart material choice with easy restoration and maintenance

Due to its durability, it is easy to restore in the event there is a crack or damage to material. While cooking in the kitchen, you have probably damaged the tops of your counters with knives and cookware. Staron solid surface can be easily restored to make your kitchen new again.

# ACTIVITY

## Durable material resistant to surface damage

Staron solid surface is a durable material that can easily withstand heavy surface use and is impact resistant. In case of damage or cracks, the surface is easily repaired as if new. In addition, the non-porous surface is impervious to moisture, making them highly resistant to bacterial growth. Whether you are designing an RV, yacht or a confined space for a variety of activities, it is a sanitary material choice.
