cast sinks and bowls

Staron is a sophisticated blend of pure acrylic, pigments and natural minerals. It is manufactured by world leading Samsung and offers the continuity of support and stability that only an organisation of that size can provide.

Staron provides a smooth, robust, non porous and completely hygienic surface with imperceptible seams to meet the highest standards for functionality and aesthetics.

Staron and the environment
Staron sheets, sinks and bowls comply with two Greenguard certification programmes. One for low emission interior furnishings and the second a more stringent Children and Schools certificate.

cast sinks and bowls

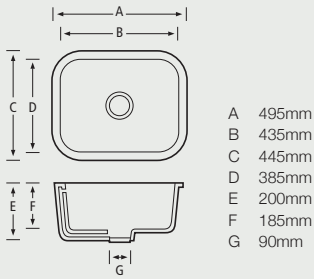

Mirostone is a pure acrylic based solid surfacing range. Mirostone sinks & bowls are non-porous and have no open joints or seams when installed into an acrylic solid surface. This means you have a completely hygienic and easy to maintain surface and sink or bowl which flow together giving you a sensational look in both your kitchen and bathroom.

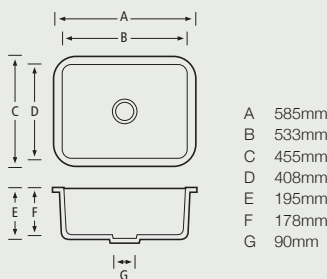

Drainer grooves can be graduated within the solid surface from 2mm – 5mm to create a water fall that drains away drips and splashes.

*These colours may require additional maintenance.
*Contains metallic flakes that have reflective properties, which may cause the colour to look different (brightness) depending on the angle of view.

The printed reproduction of colours is limited by the printing process. Please view actual sample prior to selection. Darker colours in the Samsung Staron range are more delicate than lighter colours and require a greater level of care.
