

ThermoLine

Post-formed Corian® Worktops

distributors of

DuPont™
CORIAN®
SOLID SURFACES

**A new generation
of Corian® worktops
for the healthcare
market**

ThermoLine

What is ThermoLine?

- A new cost-effective solution which makes Corian® viable for large scale healthcare projects
- ThermoLine significantly reduces the fabrication time involved in making a Corian® worktop
- It provides Corian® fabricators with finished worktop runs which incorporate 100mm covered upstands and a 38mm curved downstand with anti-drip edge

An easy and cost-effective solution for making high quality Corian® worktops

ThermoLine Corian® worktops allow Corian® fabricators to fulfil large-scale projects in limited timescales. It guarantees a fast turnaround for a fabricator without compromising the final product quality.

ThermoLine

ThermoLine worktops have been developed using the properties of Corian® to create a simple and effective solution with the following features and benefits:

- Integrated coved upstand
- Anti-drip front edge and downturn
- No joints and glue lines on the upstand and downturn
- Increased strength and resistance compared to standard 12mm solid surface worktops
- Does not need a ladder frame support as with standard 12mm solid surface worktops
- Up to 1.5m spans can be unsupported
- Easy to transport

Where can ThermoLine be used in the Healthcare environment?

- Testing areas and laboratory worktops
- Operating rooms
- Patient bathrooms and bedrooms
- Nurses' stations
- Public toilet vanity tops
- Preparation counters
- Dental surgeries
- Cafeteria and food services

ThermoLine

This revolutionary new process forms a finished worktop from one single piece of DuPont™ Corian®.

Normally, to create a coved upstand and an anti-drip front edge would involve several different fabrication processes.

The technology behind ThermoLine significantly reduces fabrication time by making use of the thermoforming capabilities of Corian®.

The end product results in saving approximately 70% of the labour time required for fabricating a basic worktop.

The finishing touches can be added as with a normal Corian® worktop by a Corian® fabricator.

ThermoLine worktops can be made with many different colours in the Corian® range*

** Some colours may show a light whitening around the curved sections. Please check before specifying.*

Where else can ThermoLine be specified?

- Dental hospitals and surgeries
- Hotel vanities
- Laboratories
- Student accommodation
- Prisons
- Marine
- Armed forces accommodation
- Office fit-outs
- Kitchen worktops for large scale developments

DuPont™ Corian® is the perfect worktop surface for the healthcare environment

Features	Benefits
Non-porous	Easy to clean, disinfect and decontaminate all of which can reduce cross-contamination risks
Solid	<p>Colours and patterns run all the way through and cannot wear off</p> <p>No delaminating possible</p> <p>Easy to renew so Corian® does not need to be replaced and stays looking good for many years – healthcare facilities that use Corian® give a stronger return on investment than other materials</p>
Microbial growth is not supported with proper cleaning	<p>Corian® is listed by Greenguard under ASTM D 6329 guidelines as microbially resistant</p> <p>Corian® joints are virtually seamless and therefore do not present any cracks or holes for dirt and germs to penetrate</p> <p>Corian® also resists fungal growth much better than other surface materials</p>
Functionally seamless joints	When two sections of ThermoLine Corian® worktop are glued together with Corian® adhesive they form a hard joint resulting in a smooth surface. No grooves, grout lines, cracks or holes mean that moisture and dirt cannot collect and mildew or mould is not an issue
Hard-wearing	Corian® survives the impact marks and cuts that can occur with daily wear and tear
Superior stain resistance compared to laminates and stone	<p>Corian® can be renewed by scrubbing or sanding and therefore most common healthcare stains can easily be removed :</p> <ul style="list-style-type: none"> - Blood - Betadine - Rust - Spent x-ray developer fluid - Gentian's violet - Wright's stain - Nail polish - Black permanent marker
